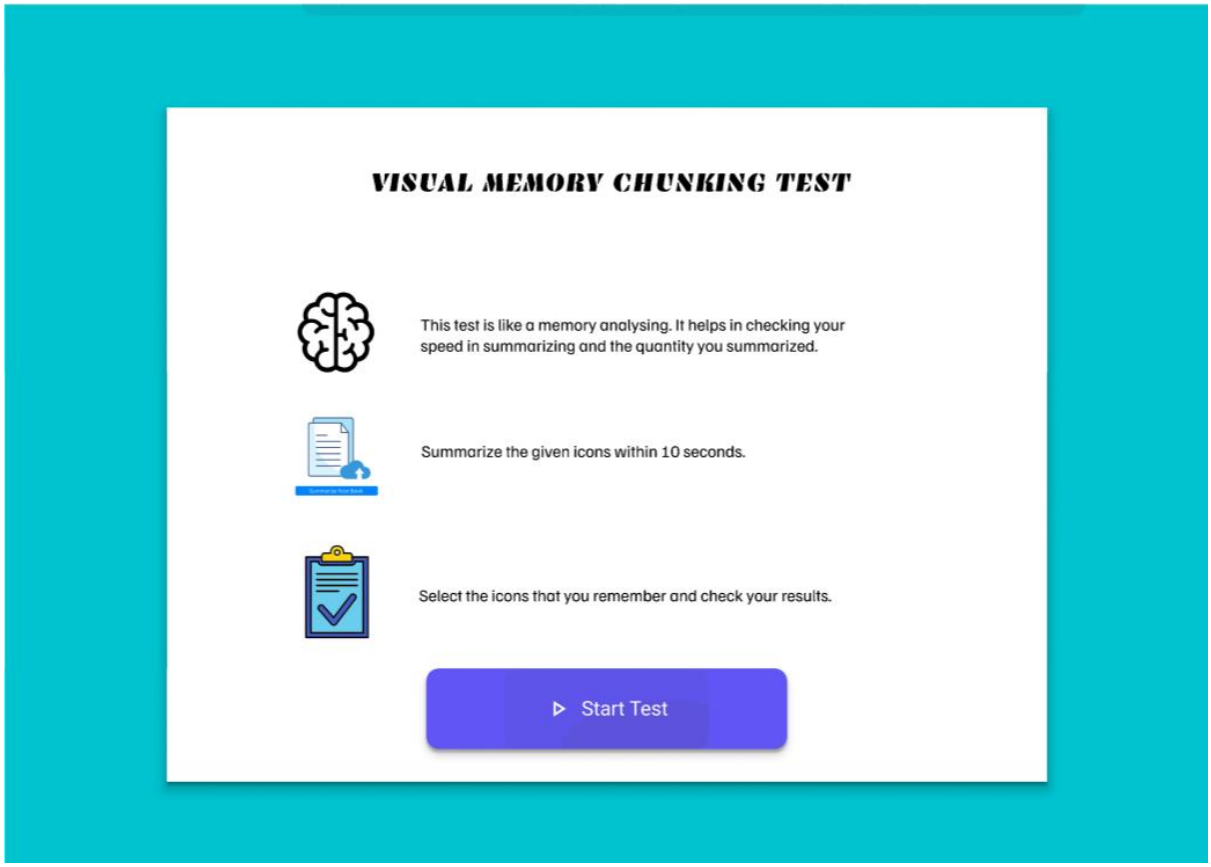
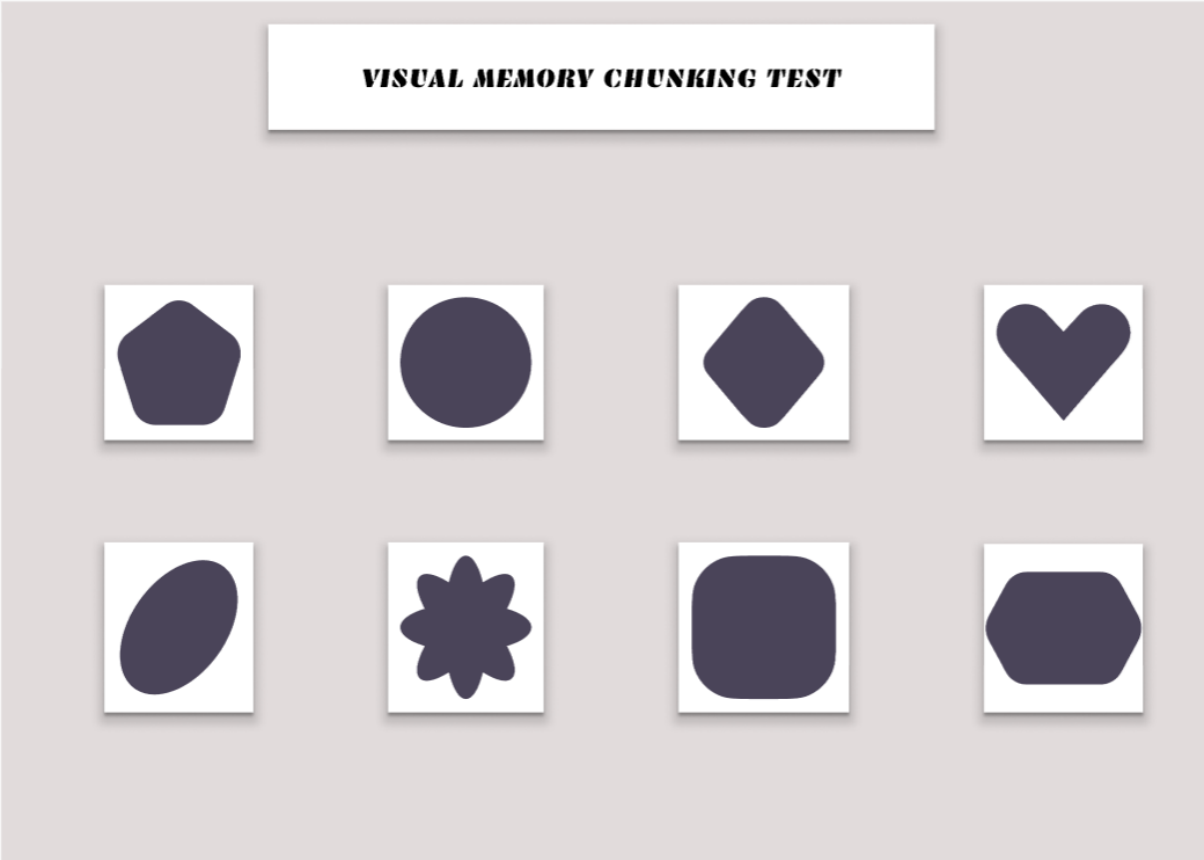
UID Experiment-2
Visual Memory Chunking Test

Frame 1:



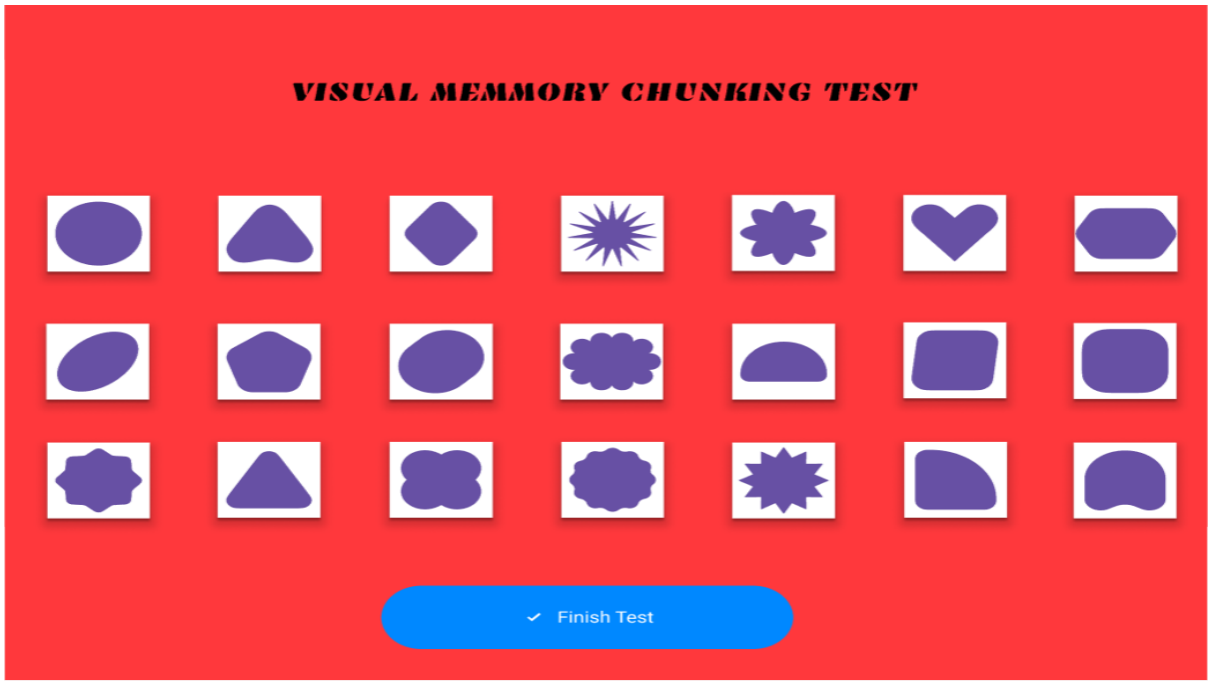
- The 1st frame consists of icons with text that helps user to understand the test he is going to take.
- It has a brain icon that says about the test.
- It has an icon that defines summarizing.
- It also has a test icon to attend and check results.
- The frame also has a button “Start Test” that could navigate to next frame when pressed.

Frame 2:



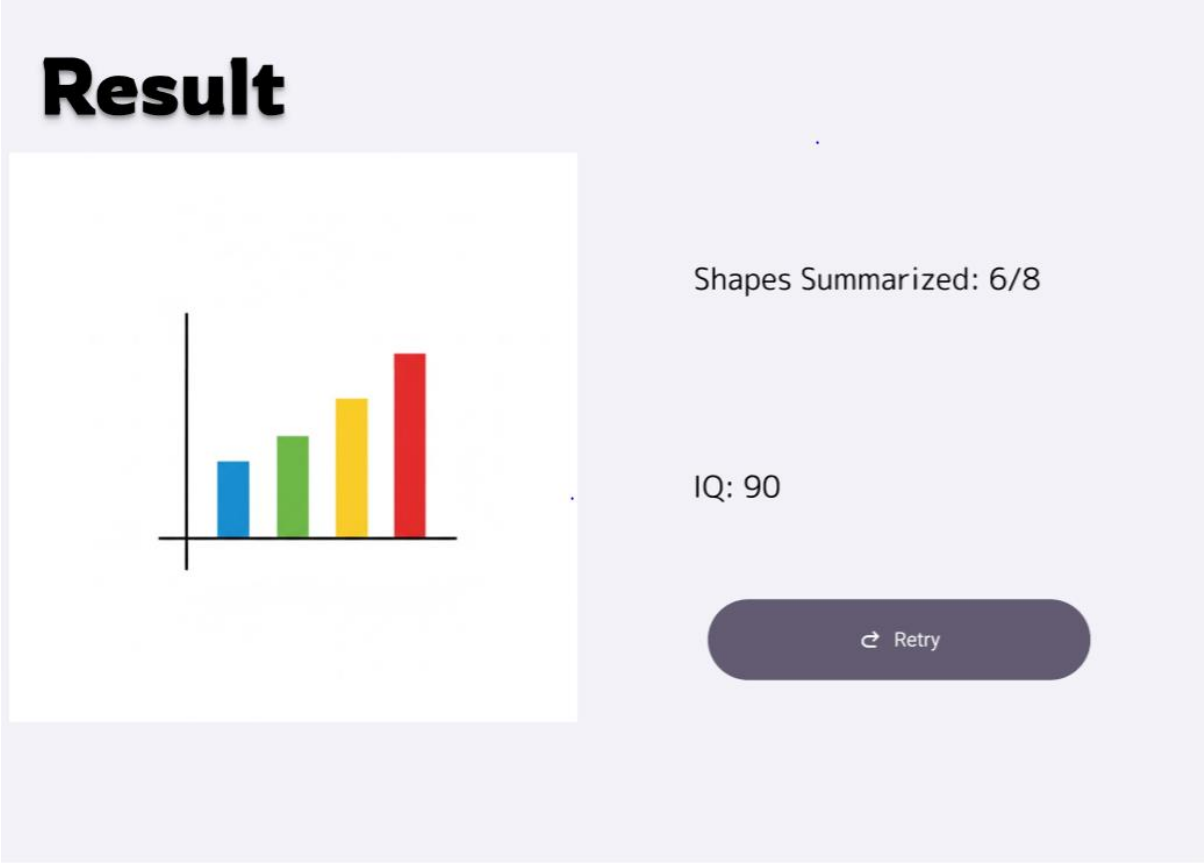
- After the user has taken test the next frame comes where there will be shapes that is given to the user to memorize.
- The user must memorize the given shapes within 10 seconds.
- After 10 seconds the next frame will be presented automatically.

Frame 3:



- This is the 3rd frame where user must select the shapes memorized.
- The user must select only the 8 shapes given to memorize.
- After selecting the user can click on the button finish test where this button could navigate to next frame where results are shown.

Frame 4:



- This is the final frame 'Result' where user can analyse his result and can see how many shapes he has memorized.
- If the user isn't satisfied of the result, he can retake the test by clicking the retry button.
- The retry button can navigate to 1st frame again to retake the test.
